EMAIL: INFO@PHARMABOX24.CO.UK

WEB: PHARMABOX24.CO.UK

What is Pharmabox24?

Pharmabox24 is an automated collection point which is available 24/7 meaning your customers can pick up their prescription items at their convenience.

Give your customers/patients the best possible service and compete with distance-selling pharmacies.

Why install a Pharmabox24?

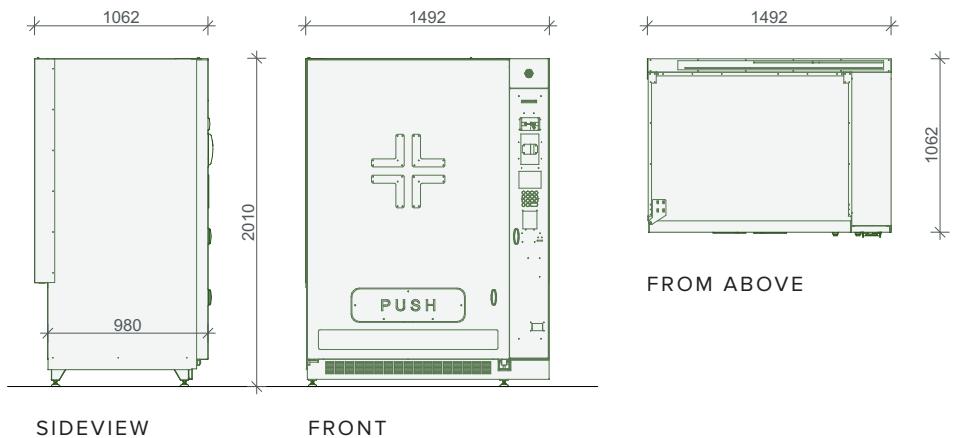

Pharmabox24 offers added convenience to your customers allowing them access to picking up the prescriptions 24 hours a day / 7 days a week.

These super-efficient employees are constantly working for your pharmacy growing business and giving a competitive edge versus online pharmacies.

OUTSIDE OR INSIDE MODELS

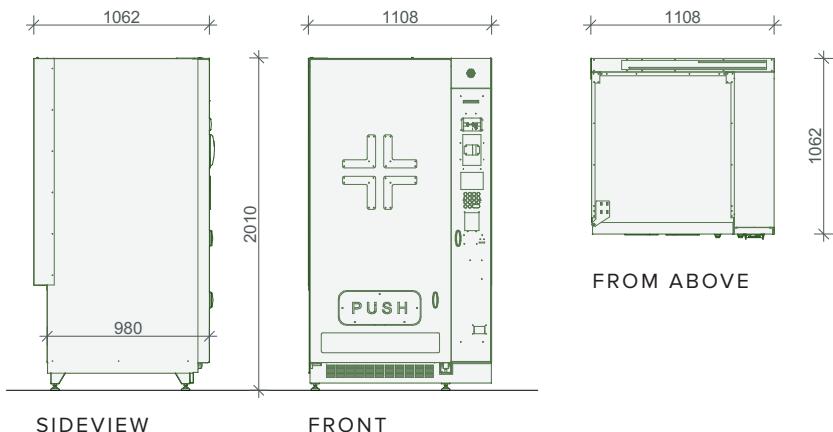

MAXI

Dimensions: Width: 1492mm Height: 2010mm Depth: 980mm

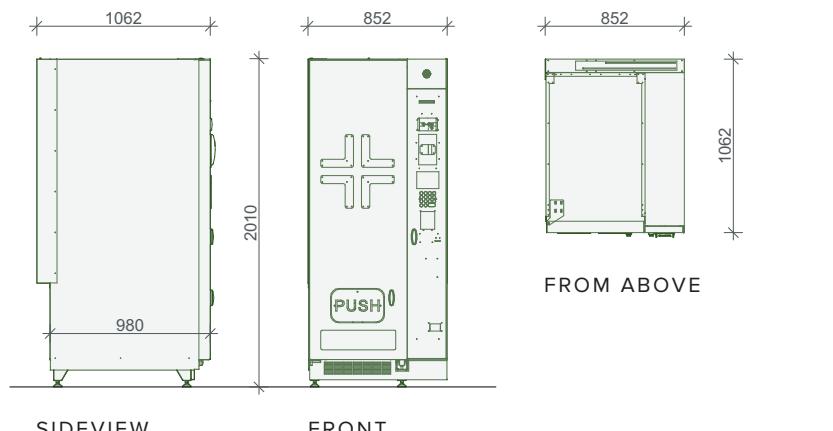

MIDI

Dimensions: Width: 1108mm Height: 2010mm Depth: 980mm

MINI

Dimensions: Width: 852mm Height: 2010mm Depth: 980mm

How Does it Work?

Load the prepared prescription bag into the back of the machine and Pharmabox24 will send a text to your customer with a PIN telling them that their items are ready to collect!

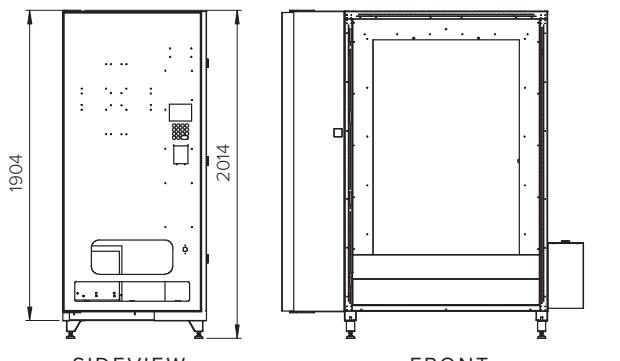

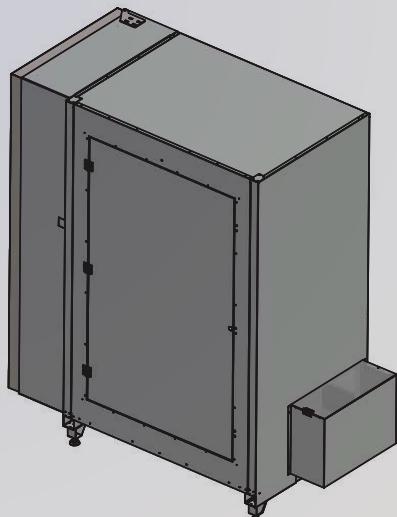

The customer can then collect at their convenience
– No more waiting in for a delivery!

The Prescription

Item(s) are prepared, labelled, checked and bagged by the pharmacist and the dispensing team and an address label is attached to the outside of the bag.

The Dispensing Team

If the address label does not include a bar code, the Pharmabox24 will produce a new bar code to attach to the bagged prescription items. One of the team scans a location slot for the bag; scans the bag label; places the bag in that location; and then re-confirms by scanning the location code.

The Pharmabox24

When the bag is scanned into its location, the Pharmabox24 technology texts the patient with a PIN number telling them that their prescription is ready for collection.

The Customer

Goes to the Pharmabox24 Collection Point, enters their PIN and collects their medicine at their time of choosing.
